METHODOLOGY

For purposes of estimating current NIS costs the following equations were used:

External contracts	[REDACTED]	25X1A1a
OCI/OER	[REDACTED]	25X1A1a
OBGI	[REDACTED]	25X1A1a

25X1A1a

Many year costs [REDACTED] for contractors include overhead. Management/supervision/clerical costs, which are additional, are accounted for in estimated totals for contractors.

For purposes of estimating manpower requirements in contributing offices (internal CIA and external contractors) an equation of 2 General Survey chapters per many year was used, except for the Country Profile for which 4 chapters per many year was used.

For option C. 1. costs were generally calculated at 30% below FY73 costs.

For option C. 2. costs were calculated at 40% below those of option C. 1.
